CAREER HIGHLIGHTS

- Delivered 100+ WordPress websites across fintech, enterprise, e-commerce, and other business domains.
- Led WordPress development teams and managed technical delivery, development workflows, and production issues.
- Built headless WordPress solutions using WordPress, Next.js, React.js, Redis, Docker, and REST APIs.
- Developed custom WordPress themes, plugins, integrations, and reusable components based on business requirements.
- Worked on high-profile financial platforms including HDFC Sky, Angel One, and IIFL Capital.
- Experienced in performance optimization, caching, SEO improvements, migrations, debugging, and ongoing website maintenance.

PROFESSIONAL EXPERIENCE

Senior WordPress Engineer / Tech Lead | KraftPixel | Jun 2023 – Present

- Lead a team of developers delivering WordPress-based fintech platforms and enterprise web solutions.
- Own technical planning, architecture decisions, development workflows, code quality, and deployment coordination.
- Architect and develop headless WordPress solutions using WordPress, Next.js, React.js, Redis, Docker, and REST APIs.
- Translate business and technical requirements into implementation plans and assign work across the development team.
- Review code, troubleshoot complex issues, mentor developers, and support production releases.
- Optimize high-traffic platforms through caching, API/database optimization, frontend performance improvements, and technical SEO.

Senior PHP Developer | Spaculus Software | Sep 2019 – Apr 2023

- Developed custom WordPress themes, plugins, integrations, and enterprise websites using PHP and WordPress.
- Built and customized Shopify stores, themes, and third-party integrations with focus on performance and maintainability.
- Implemented reusable components and custom functionality based on client requirements.
- Diagnosed and resolved production issues, performed website maintenance, and supported multiple client projects.
- Collaborated with designers, project managers, and developers to deliver responsive and scalable web solutions.

PHP Developer | e-Intelligence | May 2017 – Aug 2019

- Developed WordPress websites, custom features, and theme functionality for multiple client projects.
- Worked on AMP and WordPress development and supported performance-focused implementations.
- Managed website updates, maintenance, debugging, and technical issue resolution.

PHP Web Developer | Yogi Infotech | Oct 2016 – May 2017

- Developed CMS-based websites and web applications using Core PHP.
- Built responsive web interfaces in collaboration with design teams.

SELECTED PROJECTS

HDFC Sky – Financial Platform

Led architecture and development using WordPress, Next.js, Redis, Docker, and Node.js; implemented scalable headless CMS architecture for financial-services workflows.

Angel One – Stock Brokerage Platform

Developed backend automation and headless CMS capabilities for blog management; improved performance and reliability through caching and optimization.

IIFL Capital

Led architecture and development using WordPress, Next.js, Redis, Docker, and Node.js; implemented scalable headless CMS architecture.

EDUCATION & CERTIFICATIONS

Bachelor of Engineering (Computer Engineering) — Gujarat Technological University | 2013–2016

- Shopify Development Certification
- Advanced WordPress Elementor Certification
